First steps

Read the Docs simplifies software documentation by automating building, versioning, and hosting of your docs for you. Think of it as *Continuous Documentation*.

Never out of sync Whenever you push code to your favorite version control system, whether that is Git, Mercurial, Bazaar, or Subversion, Read the Docs will automatically build your docs so your code and documentation are always up-to-date.

Multiple versions Read the Docs can host and build multiple versions of your docs so having a 1.0 version of your docs and a 2.0 version of your docs is as easy as having a separate branch or tag in your version control system.

Free and open source Read the Docs is free and open source and hosts documentation for nearly 100,000 large and small open source projects in almost every human and computer language.

First steps

Are you new to software documentation or are you looking to use your existing docs with Read the Docs? Learn about documentation authoring tools such as Sphinx and MkDocs to help you create fantastic documentation for your project.

- **Getting started:** [With Sphinx](#) | [With MkDocs](#)
- **Importing your existing documentation:** [Import guide](#)

1.1 Getting Started with Sphinx

Sphinx is a powerful documentation generator that has many great features for writing technical documentation including:

- Generate web pages, printable PDFs, documents for e-readers (ePub), and more all from the same sources
- You can use reStructuredText or *Markdown* to write documentation
- An extensive system of cross-referencing code and documentation
- Syntax highlighted code samples
- A vibrant ecosystem of first and third-party [extensions](#)
